

Jon Deichmann

React Web / Native Developer

Austin, TX | 512-808-6746 | jcadeichmann@gmail.com | jcadev.vercel.app

Passionate self-taught React web developer of 3+ years with professional experience building responsive websites, web apps, and native apps using React/React Native, TypeScript, Tailwind and Next.js.

SKILLS & TECHNOLOGIES

Favorite Stack: HTML/CSS/TypeScript, React (Web & Native) or NextJS, Tailwind, Supabase/Firebase

Also Familiar With: Vite, Vercel, PostgreSQL

UI & Design: Figma, Adobe Photoshop, Adobe Premiere Pro, Canva

PROFESSIONAL EXPERIENCE

React Native / Web Developer (Remote) – White Oak Music Hall | Oct 2025 - Mar 2026

(Hell's Heroes VIII Festival App)

- Re-contracted to build on the previous festival app, migrating from state-managed tabs to full page routing for a cleaner navigation architecture.
- Improved UX for the local food and drinks map—more fluid scrolling and snappier tap response on the overlaid business carousel.
- Drastically enhanced the schedule sharing feature to dynamically render image cards based on the number of bands selected, eliminating single-band card clutter and producing share-worthy visuals for social media.
- Rebuilt the CMS from the ground up—fest staff can now manage everything: lineup, show dates, stages, vendor list, local businesses, and external/social links, plus a new overview page displaying a live snapshot of all app data.
- Expanded platform support from iOS-only to full iOS and Android deployment.

Front End React Native Developer (Remote) – Internship (Mognito) | May 2025 - Dec 2025

(Duolingo style learning app)

- Developed and deployed reusable UI templates for various user activities.
- Built user profile pages with editable settings and reminders, avatars, and goal/streak tracking.
- Enhanced existing UI components to align with Figma designs and improve reusability and consistency.
- Contributed to MVP scoping and goal-setting; collaborating with UI designer, back end engineers, and CEO.

React Native / Web Developer (Remote) – White Oak Music Hall | Oct 2024 - Mar 2025

(Hell's Heroes VII Festival App)

- Contracted to design (w/ Figma) and develop a React Native iOS app and a web-based CMS for managing real-time news and events for a music festival, integrating Firebase (Firestore & Auth) for storing and retrieving bands, set times, news feed, and selected local shops/restaurants.
- Built a one-tap schedule-building feature, leveraged regex text formatting, and led testing and deployment—all while rapidly mastering TypeScript/React Native/Expo and libraries like react-view-shot, react-native-maps, and async-storage.

React Web Developer (Remote) – Chingu | Jan 2025 - Feb 2025

(Personal Project w/ Group)

- Collaborated on a 5-person dev team to build a menu scheduling SPA with React/Tailwind and Firebase Auth for manager-only access.
- Led architecture decisions like file structure and custom hooks; contributed to UI development using Tailwind CSS while actively participating in daily standups and weekly scrum meetings.
- Successfully suggested and implemented auth integration as stretch goal
